WORK EXPERIENCE

Elcam Medical Italy - Manufacturing Intelligence Engineer

- Managed and maintained the corporate Data Warehouse and databases, ensuring data quality, integrity and availability for operations and business functions
- Developed and maintained SQL procedures and data integration flows to support reporting, production traceability and performance analysis.
- Designed and implemented OEE (Overall Equipment Effectiveness) automation, connecting workcenters via OPC-UA protocol
- Built interactive dashboards and reports using BI tools such as SSRS Report Builder, Qlik Sense, Grafana and Power BI to monitor production, KPIs and support data-driven decisions
- Created process automations with Power Automate to streamline repetitive tasks (notifications, data updates, report distribution) and reduce manual work
- Built a full-stack HR web application using JavaScript, Node.js, PostgreSQL, featuring data ingestion from Excel/CSV files, automated reconciliation, dynamic reporting and an analytics dashboard

Mar. 2024 - present
Carpi, IT

Elcam Medical Italy – Production & Pianification Assistant (internship)

- Helped the operations team with scheduling workcenters
- Manufacturing Orders generation and management using Infor M3
- Completed Bachelor's Thesis on *Demand Driven Material Requirements Planning*

Sep. 2023– Mar. 2024
Carpi, IT
